

StickMover - Quick Start Guide

Thank you for choosing our StickMover!

You are holding more than 4 years of development in your hands. We tested it very long and intensively. If you have unexpected problems with your StickMover, please keep us informed immediately so that we can find a solution together.

Please visit our website <https://www.avirem.de/en/support/> where you will find the necessary download to install the software.

Please download the software (depending on your installed operating system) and follow the instructions of the installation routine.

Connect your StickMover to the computer with the supplied USB cable and connect the StickMover 5 Volt power supply you'll find in the shipment.

Please control the input-voltage of the power supply to ensure the right voltage for your country.

Now you can start the "AVIrem" program.

In the first step, you will be prompted to register the device, please enter the code of the StickMover, that can be found on the bottom side of the StickMover.

After the registration, your software is ready for use.

Start the software and go to the "Settings" page and select the mode you'll like to fly.

Also, a calibration should be performed.

Now you can select training units (AVIskills) via the shop and load them.

To load the AVIskills, please enter the voucher code you received from us together with your delivery.

A detailed users manual can be found in the support area on our homepage www.avirem.de

Have fun with the StickMover

Your AVIrem Team
